

Case Study

Business Plan Area
Security/ACISWEB
Safe and Secure

What was the problem?

Photographs of excluded individuals had to be created printed off circulated and collected at their expiration. This whole process could take a whole week or more.

What we did

Worked with the owners of ACIS (Active Crime Intelligence System) to create an on line incident reporting system with the ability to provide images of excluded individuals for shopwatch and pubwatch over a secure server. Mansfield BID were the first Business Crime Partnership to use ACISWEB.

Outcome

- More accurate timely intelligence
- Reduced printing costs
- Better Data Protection compliance
- Approved users provided with the ability to report incidents direct to the Business Crime Coordinator, view photographs of excluded people from any computer/laptop or smart mobile
- Reduced time in delivering and collecting photographs
- Download notification to coordinator with encryption and watermark to prevent photocopying and mis-circulation of data.
- Ability to remove any circulation instantly.
- Regular incident data for businesses and police.
- Analysis of data to ensure targeted activity
